## Education

---

### Narsee Monjee Institute of Management Studies (NMIMS)

MBA in Information Technology and Systems Management - Distance Education

Mumbai, India

January 2022 - December 2023

### Savitribai Phule Pune University (SPPU)

Bachelor of Engineering in Electronics and Telecommunications Engineering (GPA: 7.16/10)

Pune, India

August 2016 - May 2020

## Work Experience

---

### TACHI-S

Lead Project Engineer - Cloud and SaaS

Tokyo, Japan

April 2025 – Present

- Build and operate **Azure Data Factory** V2 pipelines supporting upto a million row datasets per run.
- Design reusable, metadata-driven ADF pipeline frameworks, reducing new source onboarding time by upto **60%** and eliminating hardcoded client/table dependencies while **avoiding license upgrade costs**.
- Implement zone-based ADLS Gen2 architecture with Entra ID RBAC + POSIX ACLs. Eliminated vendor support expenses, delivering approximately **10M JPY** in cost **savings**.
- Designed and deployed 13+ custom **AI agents** and agent flows **reducing** manual request processing **times** by **40%**.

Senior System Engineer - PaaS

April 2024 – March 2025

- Develop and implement an End-of-Line Automation system for real-time defect monitoring, collaborating closely with the onsite team, and **saving** the company **7.8M JPY** through in-house development.
- Digitize the existing manual system by developing a **PowerApps Application** for iPad, streamlining data entry and monitoring processes, managing project timelines to meet all milestones within budget and ahead of schedule.
- Led requirements analysis, system design, and mentorship for junior engineers across multiple projects.

System Engineer - Embedded Software

April 2022 – March 2024

- Developed a car seat adjustment algorithm for Tachi-S's CASE architecture using STM32 series MCU and IAR WorkBench APIs, **reducing** seat adjustment **time** by over **43%** and increasing user convenience by 25%.
- Developed a **driver drowsiness detection algorithm** utilizing sensors embedded in the driver seat to detect signs of drowsiness through changes in posture, body movement, and vital signs, contributing to a proprietary detection system.

### Hirameki Solutions

QA Analyst - Web Development

Pune, India

November 2020 – March 2022

- Transitioned **Eiken tests from paper-based to online platform**, serving **30,000+** students.
- Developed comprehensive test plans, analyzed performance with **Apache JMeter** and Postman, identifying and **resolving two login-related security bugs**.

## Leadership at Tachi-S

---

- DX Specialist Lv3
- Primary SPOC for 3 concurrent domestic projects across Japan
- Onboarding buddy for Indians
- Drove AI-powered Global IT Helpdesk initiatives and stakeholder collaboration across global teams

## Achievements

---

- CEO Award for DX on VA Project - Tachi-S
- JLPT N1 Certification (133/180)
- TOEIC Certification (990/990)
- Letter of Appreciation from Director - Hirameki Solutions
- **1st Rank**, Advanced Diploma in Japanese Language (299/300)
