Jaydeep Foujdar

Bilingual Project Manager | Digital Transformation | Cloud & AI

Website Email LinkedIn WhatsApp

Summary

Technical Project Leader with 6 years of experience delivering AI, cloud and digital transformation initiatives, combining hands-on engineering expertise with stakeholder management and measurable business outcomes. Delivered approx. **JPY 28M in cost savings**, **60% faster data-source onboarding** and **40% less manual processing**. Experienced in stakeholder management, requirements analysis and end-to-end project delivery across global teams.
Japanese (JLPT N1) | English (TOEIC 990)

Core Skills

Project & Product: Project Management, Requirements Analysis, Stakeholder Management, Project Delivery, Solution Design, Process Improvement, Cross-Functional Collaboration

AI & Automation: Microsoft Copilot Studio, AI Agent Development, Generative AI, Agentic Workflows, Prompt Engineering, Power Automate, Power Platform, AI Automation

Cloud & Data: Microsoft Azure, Azure Data Factory, ADLS Gen2, Data Integration, Data Pipelines, Metadata-Driven Architecture, Entra ID, RBAC, POSIX ACLs

Work Experience

TACHI-S
Tokyo, Japan

Project Leader | Apr 2024 – Sep 2026 — *April 2022 - September 2026*

- Led **cloud, AI and DX projects** from requirements to delivery.
- Delivered approximately **¥20M in cost savings**.
- Coordinated **stakeholders, timelines and technical teams** across projects.
- Built Azure data solutions, achieving **60% faster source onboarding**.
- Designed ADLS Gen2 architecture, avoiding vendor support cost.
- Deployed **13+ AI agents**, reducing manual processing time by **40%**.
- Mentored junior engineers and supported **multiple concurrent projects**.

System Engineer | Apr 2022 – Mar 2024

- Led the digital transformation of a production-line rework system, delivering **¥7.8M in savings** through in-house development.
- Developed automotive **seat adjustment and driver monitoring** solutions.
- Reduced seat adjustment time by **43%** through algorithm optimization.
- Contributed to a proprietary **driver drowsiness detection system**.

Hirameki Solutions
Pune, India

System Engineer — *November 2020 – March 2022*

- Transitioned **Eiken tests from paper-based to online platform**, serving **30,000+** students.
- Developed comprehensive test plans, analyzed performance with **Apache JMeter** and Postman, identifying and **resolving two login-related security bugs.**

Education

MBA – Information Technology and Systems Management
Mumbai, India

NMIMS — *January 2022 - December 2023*

B.E. – Electronics & Telecommunications Engineering
Pune, India

Pune University — *August 2016 - May 2020*

Recognition & Certifications

- CEO Award for DX - Tachi-S
- Letter of Appreciation from Director - Hirameki Solutions
- JLPT **N1** (133/180)
- TOEIC (990/990)
